

AV033

Temperature box

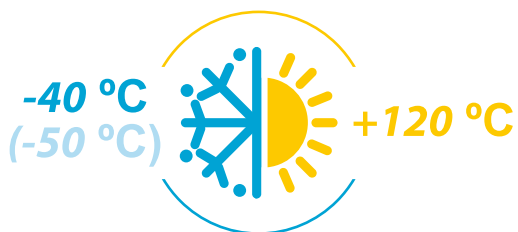

AV033

www.avrnd.eu

PARAMETERS

- ▶ For temperature range -30°C (-50°C) to $+120^{\circ}\text{C}$
- ▶ Adjustment of the internal dimensions of the temperature box for the required sample size
 - minimum 3m^3 of the interior space
- ▶ Variable temperature box arrangement for different test modes (variable temperature box bottom)
- ▶ This is a modular system, so it is possible to modify according to the customer's specifications according to the temperature box dimensions.
